MEMORANDUM FOR: Director of Information Technology, DA
FROM: [REDACTED] Chief, Information Management Staff, DO
SUBJECT: Electrical Delivery of FBIS and Imagery
Report Traffic to Special Computer Center

25X1

1. It is requested that the FBIS and Imagery Report traffic currently being sent to the Northside Center also be sent to the Special Center. This request reflects a requirement of DO task forces for up-to-date information to which they do not otherwise have immediate access. The traffic should be sent using the existing User Program ID (UPID) 'D'.

2. Access to the Imagery Report traffic will be tightly controlled to those who have the 'need to know'. Mail access will be limited through existing profile capabilities and separate data bases will be created to isolate Text access. Individuals will not be given access without their component's approval and the necessary clearances.

3. If additional information is required or questions arise, please contact [REDACTED]
